

Assignment 4 - JavaScript Code

```
1  const fs = require("fs");
2  const path = require("path");
3
4  // File paths inside the current Assignment 4 folder
5  const studentFile = path.join(__dirname, "student.txt");
6  const studentDetailsFile = path.join(__dirname, "studentDetails.txt");
7
8  // Task 1: Create Student Information File
9  const studentData = `Name: Sasanka Sekhar Kundu
10 Course: Full Stack Development
11 Technology: Node.js`;
12
13 fs.writeFile(studentFile, studentData, (err) => {
14     if (err) {
15         console.error("Error creating file:", err);
16         return;
17     }
18
19     console.log("File created successfully");
20
21     // Task 2: Read Student Information
22     fs.readFile(studentFile, "utf8", (err, data) => {
23         if (err) {
24             console.error("Error reading file:", err);
25             return;
26         }
27
28         console.log("\nStudent Information:");
29         console.log(data);
30
31         // Task 3: Update Student Information
32         const additionalData = `
33 Experience: 1 Year
34 City: Kolkata`;
35
36         fs.appendFile(studentFile, additionalData, (err) => {
37             if (err) {
38                 console.error("Error updating file:", err);
39                 return;
40             }
41
42             console.log("\nData updated successfully");
43
44             // Read updated file
45             fs.readFile(studentFile, "utf8", (err, updatedData) => {
46                 if (err) {
47                     console.error("Error reading updated file:", err);
48                     return;
49                 }
50
```

```
51         console.log("\nUpdated Student Information:");
52         console.log(updatedData);
53
54         // Task 4: Rename File
55         fs.rename(studentFile, studentDetailsFile, (err) => {
56             if (err) {
57                 console.error("Error renaming file:", err);
58                 return;
59             }
60
61             console.log("\nFile renamed successfully");
62
63             // Task 5: Delete File
64             fs.unlink(studentDetailsFile, (err) => {
65                 if (err) {
66                     console.error("Error deleting file:", err);
67                     return;
68                 }
69
70                 console.log("File deleted successfully");
71             });
72         });
73     });
74 }
75 });
76 });
```
